

AI-Powered Job Recruitment & Candidate Management System

User Story:

The development of the **AI-Powered Recruitment & Candidate Management System** was driven by user stories that captured the needs of different stakeholders involved in the recruitment process. As a **System Administrator**, I want to configure a Salesforce Developer Org, create custom objects, fields, relationships, and security settings so that the recruitment system is secure, scalable, and easy to manage. As a **Recruiter**, I want to create and manage job openings, register candidate applications, schedule interviews, and track application statuses so that the recruitment process is organized and efficient. I also want to use Dynamic Forms and Screen Flows to simplify data entry and improve productivity.

As a **Hiring Manager**, I want to review shortlisted candidates, approve high-value job offers, and monitor the recruitment pipeline through reports and dashboards so that I can make informed hiring decisions. As a **Candidate**, I want my application details to be recorded accurately and receive timely updates about interview schedules and application status so that I have a smooth recruitment experience.

As an **AI Recruitment Assistant (Agentforce)**, I want to generate candidate summaries, evaluate applicant profiles, and provide intelligent hiring recommendations using Prompt Builder so that recruiters can identify the most suitable candidates quickly and make data-driven hiring decisions. As the **system**, I want to automate repetitive tasks such as status updates, email notifications, approval routing, and duplicate record prevention using Salesforce Flows and Validation Rules so that manual effort is minimized and data quality is maintained throughout the recruitment lifecycle.

These user stories served as the foundation for designing and implementing the recruitment management application, ensuring that the solution addresses the functional requirements of recruiters, hiring managers, administrators, candidates, and AI-assisted recruitment processes.

1. INTRODUCTION

1.1 Project Overview :

The **AI-Powered Recruitment & Candidate Management System** is developed on the Salesforce platform to simplify the recruitment process. It helps recruiters manage job

openings, candidate applications, interviews, and hiring in one place. The system uses Salesforce automation to reduce manual work and improve efficiency. Agentforce AI and Prompt Builder provide candidate summaries and hiring recommendations. This solution enables organizations to make faster, smarter, and more accurate hiring decisions.

1.2 Objectives :

- To automate and simplify the recruitment process using Salesforce.
- To manage job openings and candidate applications efficiently.
- To streamline interview scheduling and hiring activities.
- To reduce manual work and minimize human errors.
- To improve the accuracy and consistency of recruitment data.
- To use Agentforce AI for intelligent candidate evaluation and recommendations.
- To support faster and more effective hiring decisions.
- To enhance recruiter productivity through an organized recruitment workflow.
- To provide a centralized platform for managing the entire recruitment lifecycle.
- To improve the overall hiring experience for recruiters and candidates.

1.3 Purpose :

The purpose of the AI-Powered Recruitment & Candidate Management System is to automate and simplify the recruitment process using Salesforce. It helps recruiters manage job openings, candidate applications, interviews, and hiring activities efficiently. The system reduces manual work, improves data accuracy, and uses Agentforce AI to support faster and better hiring decisions.

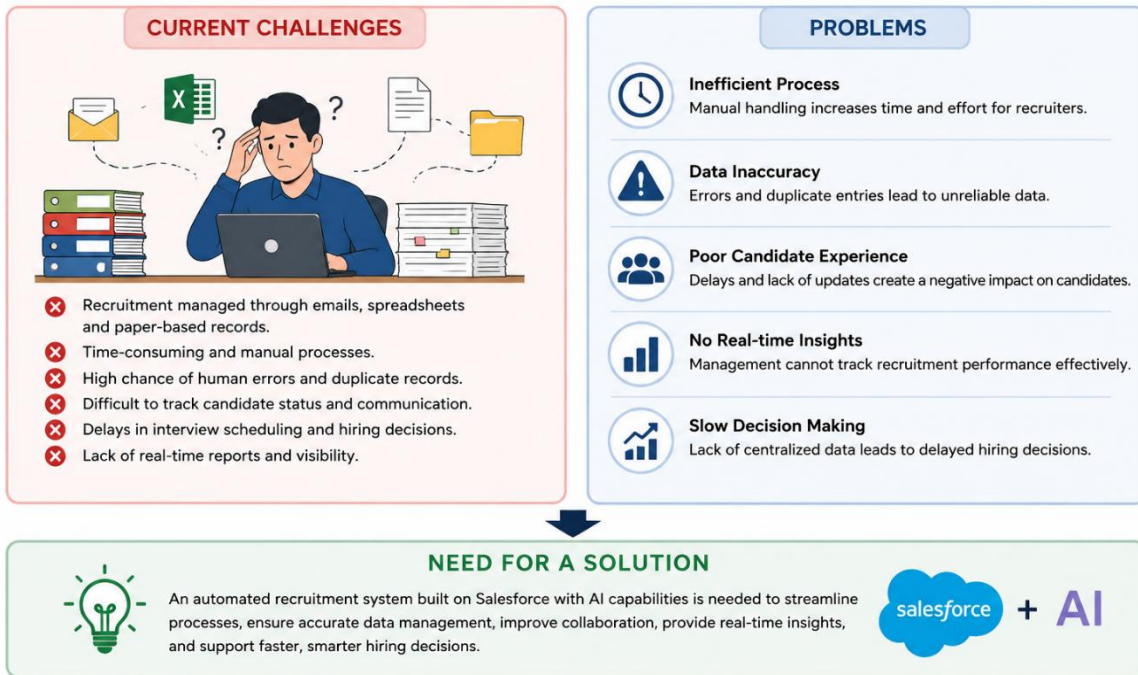

2. IDEATION PHASE

2.1 Problem Statement

Many organizations still manage recruitment activities manually using emails, spreadsheets, and paper-based records. This makes it difficult to track candidate applications, schedule interviews, and manage hiring decisions efficiently. Manual processes are time-consuming, prone to errors, and can result in delays and duplicate records. Therefore, there is a need for an automated recruitment system that streamlines the hiring process, improves data accuracy, and supports faster and smarter recruitment decisions using Salesforce and AI.

PROBLEM STATEMENT

Organizations face several challenges in managing recruitment manually.

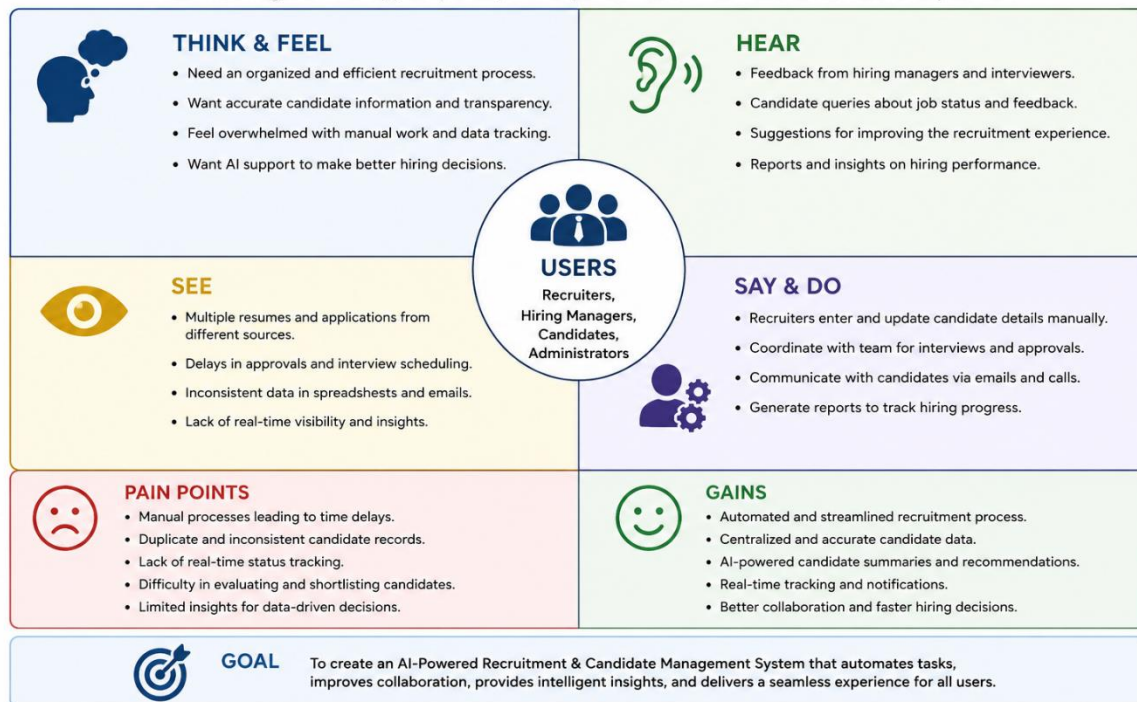

2.2 Empathy Map Canvas

The Empathy Map Canvas helps in understanding the needs, challenges, and expectations of recruiters and hiring managers. It identifies their thoughts, actions, pain points, and goals during the recruitment process. The analysis highlights the difficulties of manual hiring and the need for automation. It also shows how AI and Salesforce can improve recruitment efficiency. This understanding helps design a user-friendly and effective recruitment management system.

2.2 EMPATHY MAP CANVAS

Understanding the needs, pain points, and expectations of users in the recruitment process.

2.3 Brainstorming

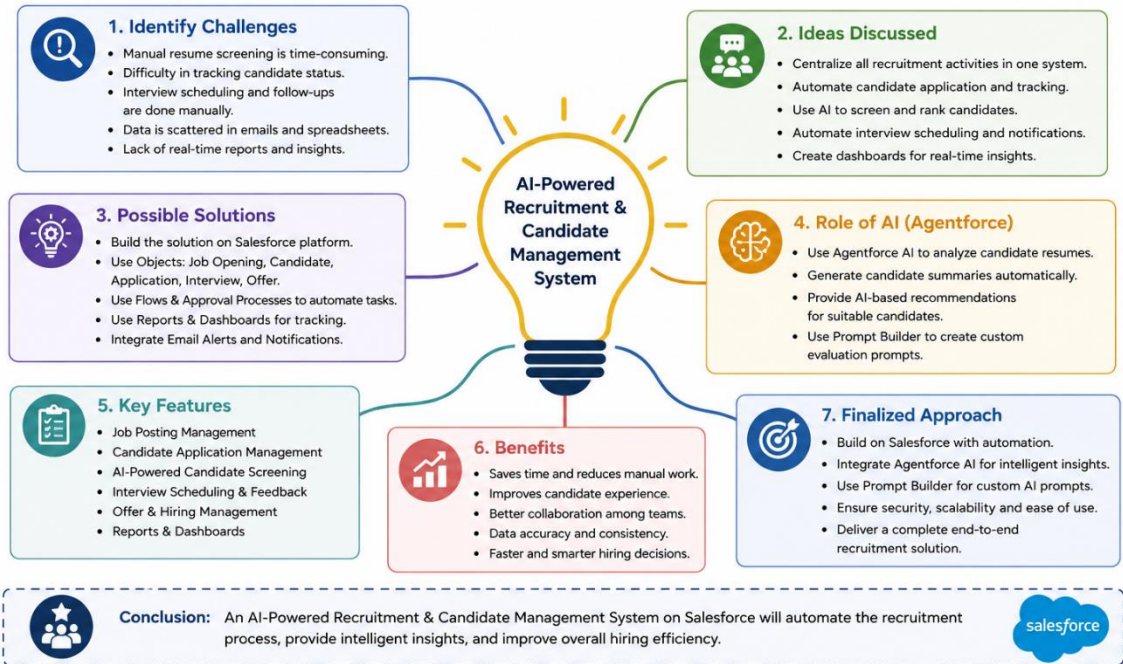

- Identified challenges in the existing manual recruitment process.
- Discussed automating candidate management and interview scheduling.
- Proposed using Salesforce to centralize recruitment activities.
- Included Agentforce AI and Prompt Builder for intelligent candidate evaluation.
- Finalized an AI-powered recruitment system to improve efficiency and hiring decisions.

Selected Idea

- Develop an **AI-Powered Recruitment & Candidate Management System** using Salesforce.
- Automate job posting, candidate applications, interview scheduling, and approval processes.
- Use Agentforce AI and Prompt Builder to generate candidate summaries and hiring recommendations.
- Implement Flows, Validation Rules, and Reports to improve efficiency and data accuracy.
- Provide a centralized, secure, and user-friendly platform for managing the complete recruitment lifecycle.

2.3 BRAINSTORMING

Ideas and discussions to identify problems and possible solutions for the AI-Powered Recruitment & Candidate Management System.

3. REQUIREMENT ANALYSIS PHASE

The Requirement Analysis Phase involves identifying and understanding the needs of the recruitment system before development begins. During this phase, the functional and non-functional requirements are gathered by analyzing the recruitment process and user expectations. The goal is to develop a system that automates recruitment activities, improves efficiency, ensures data accuracy, and provides AI-powered assistance for better hiring decisions. The requirements are categorized as Functional Requirements and Non-Functional Requirements.

3.1 Functional Requirements

- User Login and Authentication
- Manage Job Openings
- Manage Candidate Applications
- Interview Scheduling
- Approval Process for Job Offers
- AI Candidate Summary using Prompt Builder
- Agentforce AI Recruitment Assistant
- Reports and Dashboards
- Email Notifications
- Flow Automation

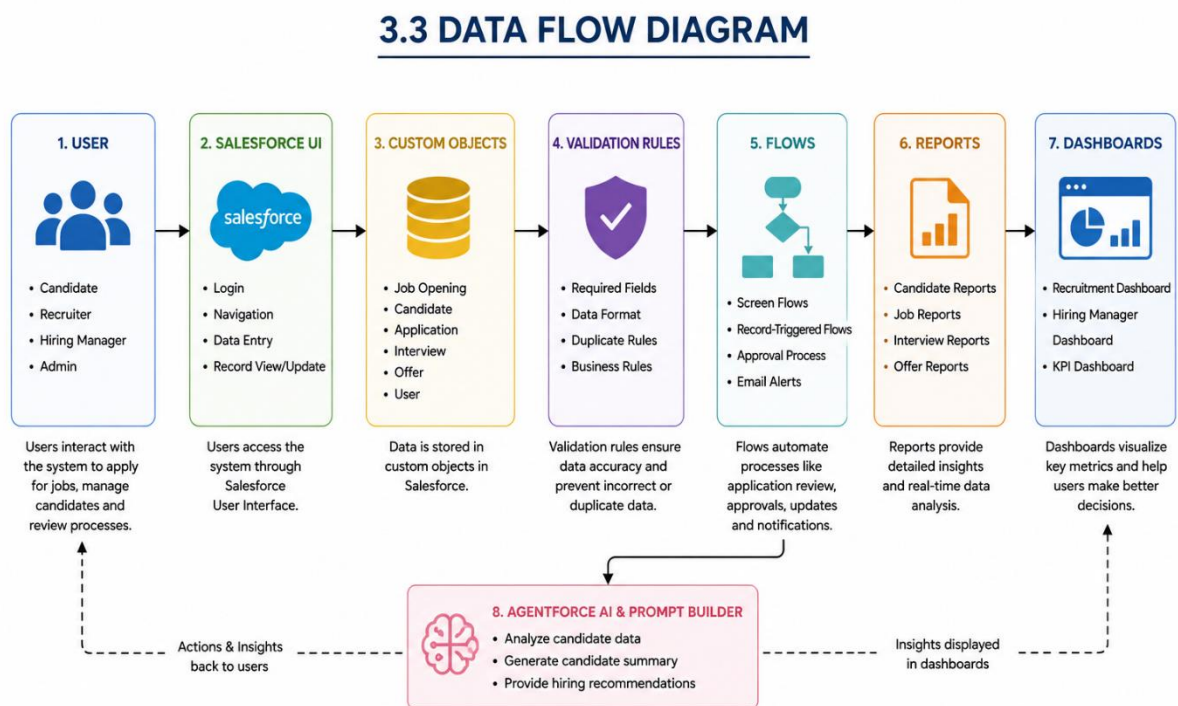

3.2 Non-Functional Requirements

- Secure user authentication
- Easy-to-use interface

- High performance and fast response
- Data accuracy and reliability
- Scalability for future enhancements
- Availability on cloud (Salesforce)
- Role-based access control
- Maintainability and flexibility

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules & Duplicate Rules → Flow Automation → Agentforce AI & Prompt Builder → Reports → Dashboards → Hiring Manager

3.4 Technology Stack

Technology	Purpose
Salesforce CRM	Core platform for developing the recruitment management system.
Lightning Experience	Provides a modern and user-friendly interface.
Custom Objects	Stores job openings, candidate applications, and recruitment data.
Flow Builder	Automates recruitment workflows and business processes.
Approval Process	Manages approval of job offers and hiring decisions.
Validation Rules	Ensures accurate and valid data entry.
Reports & Dashboards	Provides real-time recruitment insights and analytics.
Agentforce AI	Generates candidate summaries and hiring recommendations.

Prompt Builder	Creates AI prompts for candidate evaluation and summaries.
Profiles & Permission Sets	Controls user access and data security.

4. PROJECT DESIGN PHASE

4.1 Problem Solution Fit

The AI-Powered Recruitment & Candidate Management System addresses the challenges of traditional recruitment by providing an automated and centralized solution on the Salesforce platform. It eliminates manual processes by using Flows, Approval Processes, and Validation Rules to automate recruitment activities and ensure data accuracy. Agentforce AI and Prompt Builder help recruiters quickly evaluate candidates by generating AI-powered summaries and hiring recommendations. Reports and Dashboards provide real-time insights into recruitment progress, while Profiles and Permission Sets ensure secure access to data. Overall, the solution improves efficiency, reduces manual effort, and enables faster and more informed hiring decisions.

4.2 Proposed Solution

The proposed solution is to develop an **AI-Powered Recruitment & Candidate Management System** using the Salesforce platform. The system provides a centralized solution for managing job openings, candidate applications, interview scheduling, and hiring activities. It automates recruitment workflows using Salesforce Flows, Approval Processes, and Validation Rules, reducing manual effort and improving data accuracy. Agentforce AI and Prompt Builder are integrated to generate candidate summaries and provide intelligent hiring recommendations. Reports and Dashboards offer real-time insights into the recruitment process, enabling recruiters and hiring managers to make faster and more effective hiring decisions.

4.3 Solution Architecture

Architecture Layers

- **Presentation Layer** – Salesforce Lightning Experience, Dynamic Forms, Lightning App, and User Interface for recruiters, hiring managers, and administrators.
- **Application Layer** – Salesforce Flows, Approval Processes, Validation Rules, Duplicate Rules, Prompt Builder, and Agentforce AI for business logic and automation.
- **Data Layer** – Custom Objects such as **Contact**, **Job Opening**, and **Candidate Application** to store and manage recruitment data.
- **Security Layer** – Profiles, Roles, Permission Sets, and Sharing Rules to provide secure and role-based access.
- **Analytics Layer** – Reports and Dashboards to monitor recruitment progress, candidate status, interview performance, and hiring metrics.

4.3 SOLUTION ARCHITECTURE

AI-Powered Recruitment & Candidate Management System

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

Project planning is the initial phase of developing the AI-Powered Recruitment & Candidate Management System. During this phase, the project objectives, scope, requirements, and development schedule were defined. The project was divided into multiple phases to ensure systematic implementation and timely completion. Tasks were assigned based on priority, and Salesforce features were selected to meet the business requirements. An Agile development approach was followed to support continuous development, testing, and improvements. Proper planning helped deliver a scalable, secure, and efficient recruitment management solution.

6. Project Development Phase:

Project Flow

Milestone 1: Salesforce Account

Milestone 2: Objects Creation

Milestone 3- Tabs

Milestone 4: Fields & Relationships

Milestone 5 - Validation Rules

Milestone 6: APPROVAL PROCESS

Milestone 7: Email Templates

Milestone 8: Email Alerts

Milestone 9: Declarative Automation (Flows)

Milestone 10: Agentforce AI

Milestone 11: The Lightning App

Milestone 12 -Editing of Page Layouts

Milestone 13 - Dynamic Forms

Milestone 14: Users

Milestone 15 – Duplicate and Matching Rules

Milestone 16: Profiles

Milestone 17: Roles & Role Hierarchy

What You'll Learn

- Understand the recruitment process and its automation using Salesforce.
- Learn to create and manage Custom Objects, Fields, and Relationships.
- Implement Salesforce Flows, Validation Rules, and Approval Processes.
- Integrate Agentforce AI and Prompt Builder for intelligent candidate evaluation.
- Generate Reports and Dashboards for recruitment analytics and decision-making.
- Build a secure, scalable, and user-friendly recruitment management application.

Implementation

Milestone 1: Salesforce Account

Activity 1: Creating Developer Account: Creating a developer org in salesforce.

Go to <https://developer.salesforce.com/signup>

On the sign-up form, enter the following details:

fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- Build apps fast with drag-and-drop tools
- Go further with Apex code
- Build AI agents with Agentforce
- Harmonize your data with Data Cloud
- Ground Agentforce with structured and unstructured data
- Integrate with anything using APIs

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

First name Experiencial ✓	Last name Learning ✓
Job title Developer ✓	Company Smartbridge ✓
Country/region India ✓	Work email mounikakatta63@gmail.... ✓

☐ I agree to the [Main Services Agreement – Developer Services](#) and [Salesforce Program Agreement](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

Sign me up

1.First name & Last name

2.Email

3.Job Title: Developer

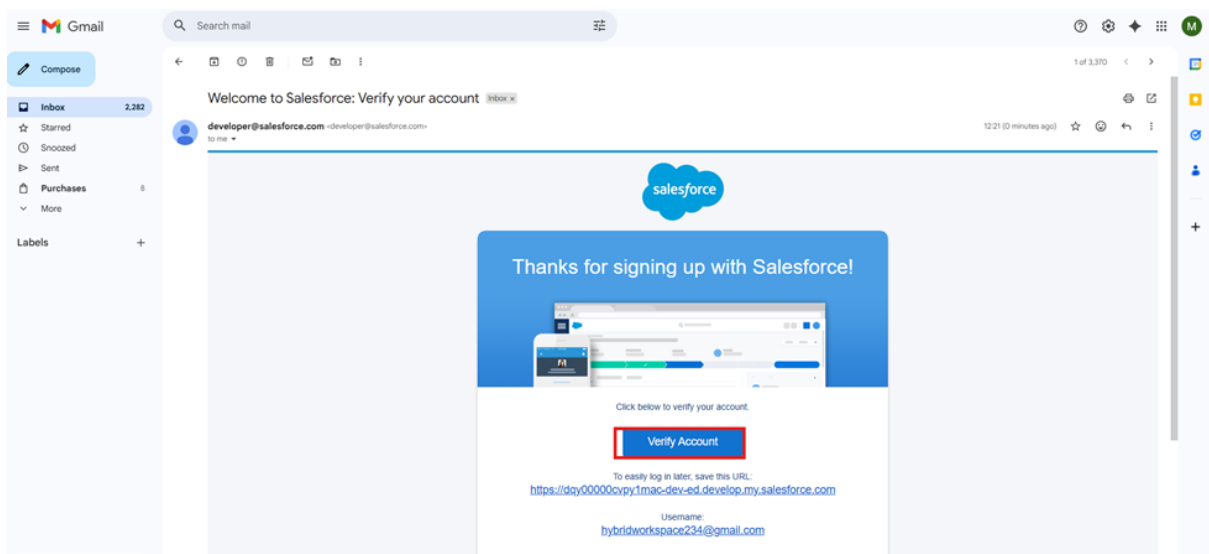

4.Company: College Name

5.Country: India

Click on sign me up after filling these

Activity 2: Account Activation

Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 10-30mins and sometimes 2 hours.

1. Click on Verify Account

2. Give a password and answer a security question and click on change password.

3. Then you will redirect to your salesforce setup page.

Milestone 2: Objects Creation

The recruitment system requires custom objects to represent hiring data.

Activity 1: Creating Job Opening Object

To create an object:

1. From the Setup page

2. Click on Object Manager

3. Click on Create >> Custom Object

4. Enter the Label name as Job Opening

5. Enter Plural Label name as Job Openings

6. Enter Record Name as Job Title

7. Select Data Type Text

8. Select Allow Reports

9. Select Allow Search

10. Enable Track Field History

11. Click on Save and New

SETUP
New Custom Object

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing [?](#)

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status [What is this?](#)

☐ In Development

☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☒ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

Activity 2: Creating Candidate Application Object To create an object:

1. From the Setup page
2. Click on Object Manager
3. Click on Create >> Custom Object
4. Enter the Label name as Candidate Application
5. Enter Plural Label name as Candidate Applications
6. Enter Record Name as Application ID
7. Select Data Type as Auto Number: CA - {0000}, Starting with 1
8. Select Allow Reports
9. Select Allow Search
10. Enable Track Field History · Click on Save

Milestone 3- Tabs

Activity 1: Creating a tab for Job Opening Object

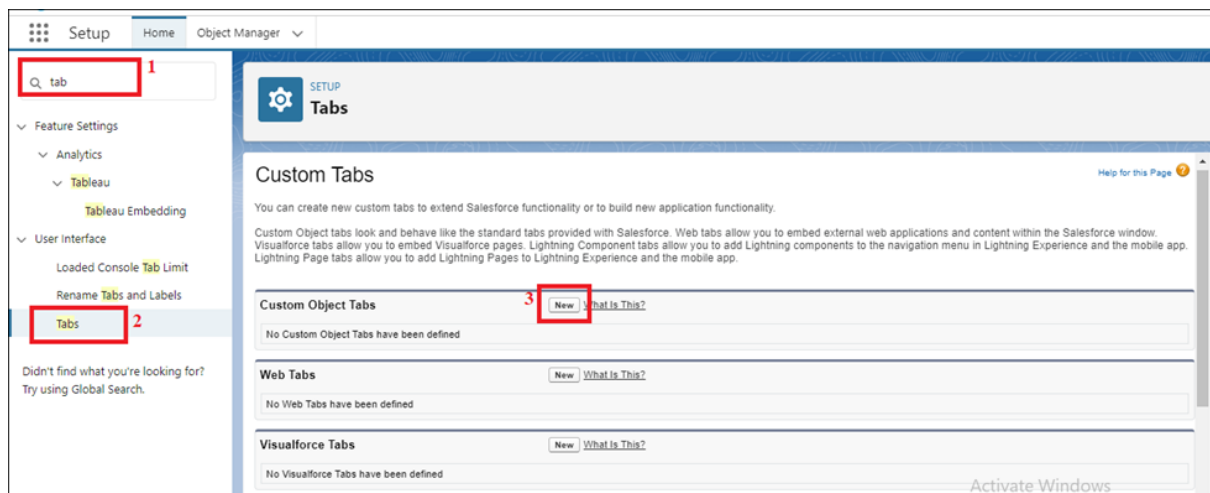

1. Go to the setup page → type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).

4. Select Object (Job Opening) >> Select the tab style

5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab.

6. Make sure that the Append tab to the user's existing personal customizations is checked.

7. Click save

Activity 2: Creating a tab for Candidate Application Object

1. Go to the setup page → type Tabs in Quick Find bar

2. Click on tabs

3. Click on New (under custom object tab).

4. Select Object (Candidate Application) >> Select the tab style

5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab.

6. Make sure that the Append tab to the user's existing personal customizations is checked.

7. Click save

Milestone 4: Fields & Relationships

Activity 1: Creation of Picklist field for Contact object:

1. Go to Setup → Click on Object Manager

2. Type object name Contact in the Quick Find box → Click on

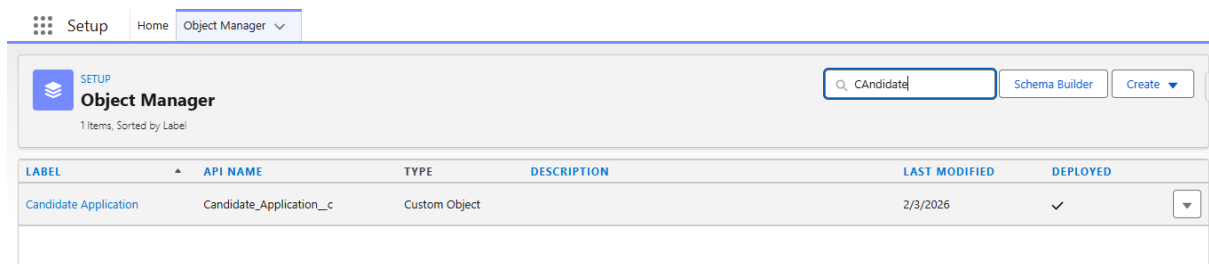

Contact

3. Click on Fields & Relationships
4. Click on New
5. Select Data Type as Picklist and click Next
6. Enter the Field Label as Experience Level
7. Click on Enter values and enter:
 - a. Fresher
 - b. Mid- Level
 - c. Senior

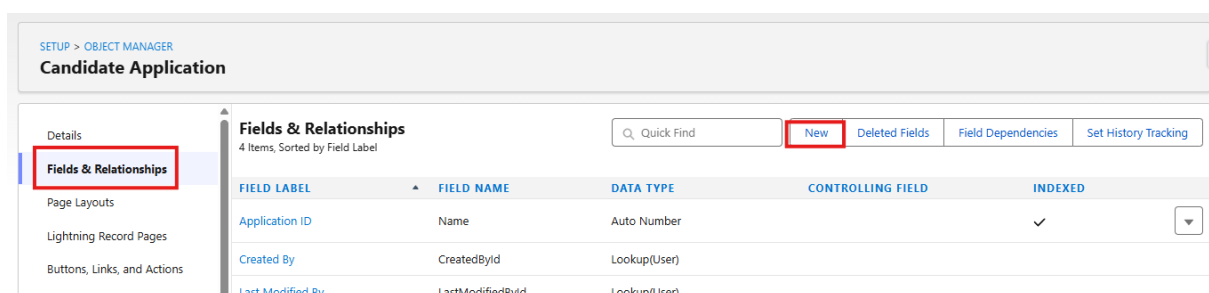

Click Next, Next, and Save

Activity 2: Creation of Master- Detail field for Candidate Application Object:

1. Go to the Setup page >> click on Object manager >> type object name (Candidate Application) in the quick find bar >> click on the Candidate Application object

2. Click on Fields & Relationship
3. Click on New.

4. Select "Master- Detail" as data type and click Next.

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected Select one of the data types below.

☐ Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☒ Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.

5. Select the related object "Contact".

6. Click on Next.

Help Text:

Child Relationship Name:

Sharing Setting: ☐ Read Only: Allows users with at least Read access to the Master record to create, edit, or delete related Detail records.

8. Click on Next, Next, Next, Save.

Note: Create other fields from the above Fields table related to this object and choose the data types of the fields carefully.

Milestone 5 - Validation Rules

Activity 1: To create a Validation rule to Candidate Application Object

1. Go to setup >> click on Object Manager >> type object name (Candidate Application) in search bar >> click on the Candidate Application object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “Offer Amount Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

Offer_Amount__c <= 0

6. Enter the Error Message as “Offer amount must be greater than zero.”.
7. Select the Error location as Top of the page
8. Click Save.

Activity 2: To create a Validation rule to Job OpeningObject 1. Validation Rule on Vacancies:

1. Go to setup >> click on Object Manager >> type object name (Job Opening) in search bar >> click on the Job Opening object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “Job Vacancies Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

Vacancies__c < 0

6. Enter the Error Message as “Vacancies cannot be negative.”.
7. Select the Error location as Top of the page
8. Click Save.

Activity 3: To create a Validation rule on Candidate Application Object 1. Validation Rule on AI Candidate Score:

1. Go to setup >> click on Object Manager >> type object name (Candidate Application) in search bar >> click on the Candidate Application object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “AI Candidate Score Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

AI__Candidate_Score__c > 100

6. Enter the Error Message as “AI Candidate score cannot exceed 100.”.

7. Select the Error location as Top of the page

8. Click Save.

Milestone 6: APPROVAL PROCESS

Activity 1: Create an Approval Process for High Salary Candidate Offer

Note:

Before implementing the Approval Process, ensure that the following milestones are completed:

Profiles creation (Recruiter, Hiring Manager, Admin)

Roles hierarchy setup

Users creation and role assignment

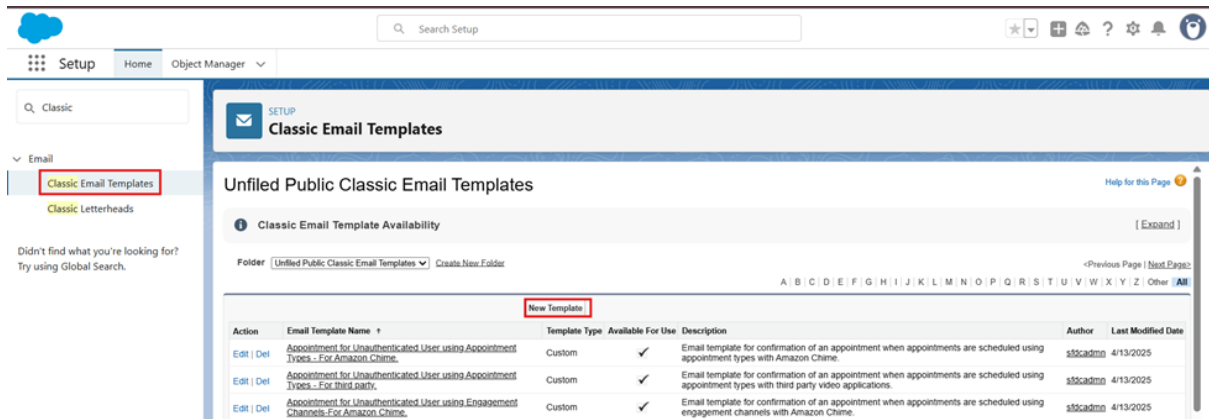

This approval process ensures that candidate job offers with high salary amounts are reviewed and approved by a Hiring Manager, preventing unauthorized compensation decisions and enforcing company hiring policies.

Create Classic Email Template

This email template will notify the Hiring Manager when a high salary candidate offer is submitted for approval.

Steps to Create Email Template

- Go to Setup (gear icon on top-right)
- In the Quick Find box, type Email Templates
- Click on Classic Email Templates
- Click New Template

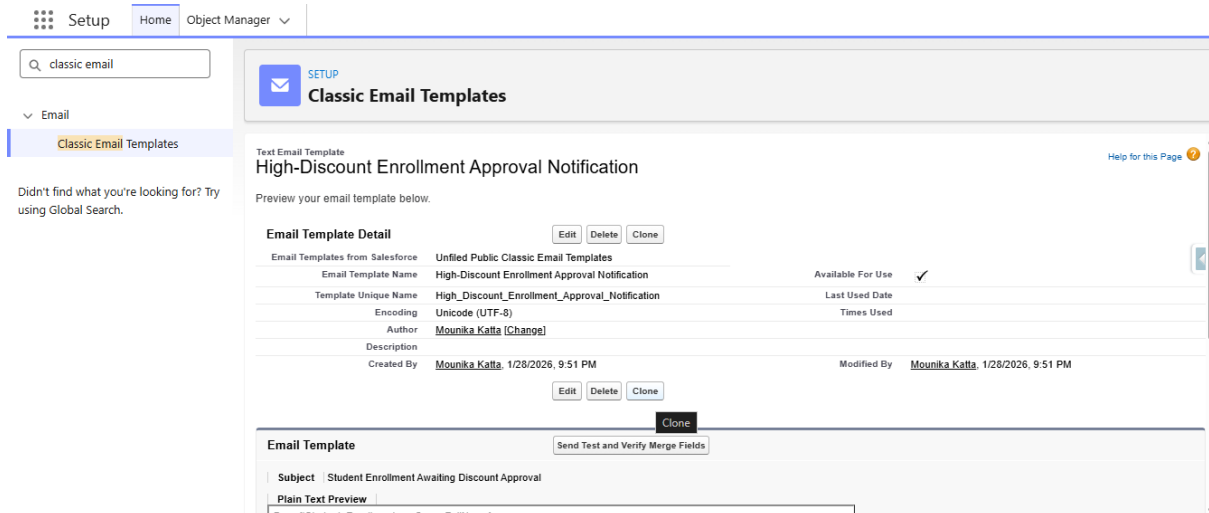

You'll now choose the type of email template you want to create.

Choose the type:

- Text – Plain text (no formatting)
- Click Next

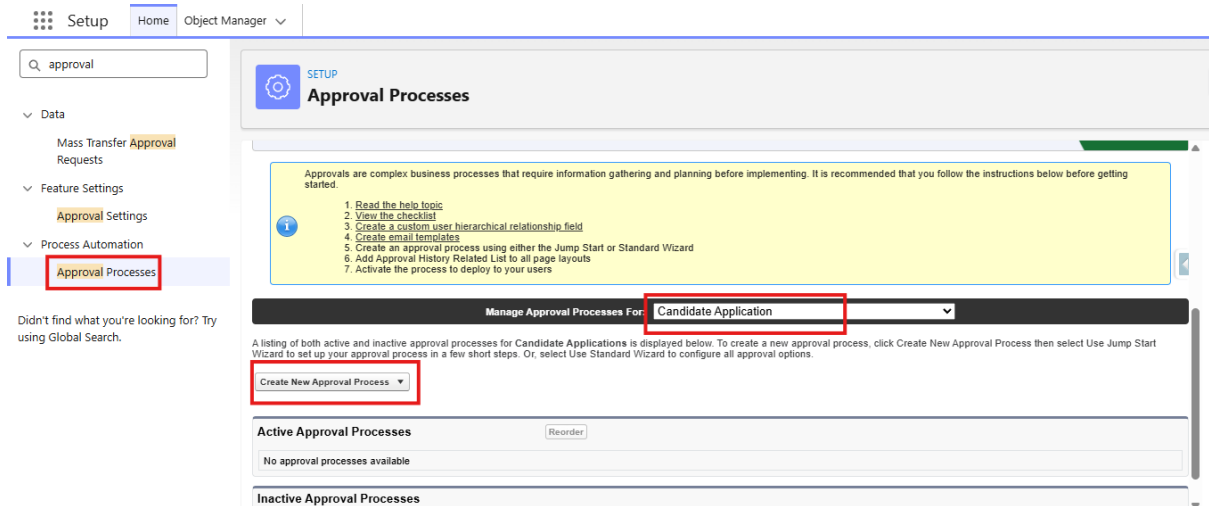

Email Template Information:

Field	Value
Folder	Unfiled Public Email Templates

When you define approval steps, you can assign approval requests to different users. One of your options is to use a user field to automatically route these requests. If you want to use this option for any of your approval steps, select a field from the picklist below. Also, when a record is in the approval process, it will always be locked-- only an administrator will be able to edit it. However, you may choose to also allow the currently assigned approver to edit the record.

Milestone 8: Email Alerts

Activity1: Create High Priority Candidate Application Email Alert

Purpose:

Automatically notify the Recruiter when a candidate application is identified as high priority by AI.

Steps:

- In the Quick Find box, search for **Email Alerts**
- Click on **Email Alerts**
- Click on **Continue**
- Click on **New Email Alert**
- Give the Description as
High Priority Candidate Application Email Alert
- Unique Name will be auto populated
- Select the Object as
Candidate Application
- Select the Email Template:
High Priority Candidate Application Notification
- For Recipient Type select **User**
- Select Recipient: **Candidate Application Owner**
- Click on **Save**

Activity2: Create High Salary Candidate Offer Approval Email Alert**Purpose:**

Notify the Hiring Manager when a high salary candidate offer is submitted for approval.

Steps:

- In the Quick Find box, search for **Email Alerts**
- Click on **Email Alerts**
- Click on **Continue**
- Click on **New Email Alert**

- Give the Description as
High Salary Candidate Offer Approval Email Alert

- Unique Name will be auto populated

- Select the Object as
Candidate Application

- Select the Email Template:
High Salary Candidate Offer Approval Notification

- For Recipient Type select **User**

- Select Recipient: **Manager**

- Click on **Save**

Activity3: Create Candidate Application Approval Status Email Alert

Purpose:

Notify the Recruiter when a candidate offer is approved or rejected by the Hiring Manager.

Steps:

- In the Quick Find box, search for Email Alerts

- Click on Email Alerts

- Click on Continue

- Click on New Email Alert

- Give the Description as
Candidate Application Approval Status Email Alert

- Unique Name will be auto populated

- Select the Object as
Candidate Application

- Select the Email Template:
Candidate Application Approval Status Notification

- For Recipient Type select User

- Select Recipient: Candidate Application Owner

- Click on Save

Milestone 9: Declarative Automation (Flows)

Activity 1: Record-Triggered Flow – High Priority Candidate Application Notification

Objective:

Automatically notify the Recruiter (Application Owner) when a candidate application is identified as high priority by AI.

Trigger Condition:

AI_Candidate_Score__c $\geq$ 85

Steps:

From **Setup**, in the **Quick Find** box, search for **Flows**.

1. Click **New Flow**.

2. Select **Category**: Triggered.

3. Select **Type**: Record-Triggered Flow.

4. Select **Object**: Candidate_Application__c.

5. Configure the trigger:

When: A record is created or updated.

6. Set the **Entry Conditions**:

Field: AI_Candidate_Score__c

Operator: Greater Than or Equal

Value: 85

7. Select:

- **Run Every time a record is created and meets the condition requirements.**

8. Optimize the flow for **Actions and Related Records**.

9. Click the + icon and add the **Send Email Alert** action.

10. Select **Email Alert**:

11. High Priority Candidate Application Email Alert

Enter the **Label** as:

High Priority Candidate Application Notification

12. Map **RecordId** to the **Record Id** field.

13. Save the Flow.

14. Activate the Flow.

Activity 2: Record-Triggered Flow – High Salary Offer Submission for Approval

Objective: Automatically submit a candidate offer for approval when a high salary amount is applied.

Trigger Condition: Offer_Amount__c > 1000000

Steps:

1. From **Setup**, in the **Quick Find** box, search for **Flows**.

2. Click **New Flow**.

3. Select **Category:** Triggered.

Select **Type:** Record-Triggered Flow.

Select **Object:** Candidate_Application__c.

5. Configure Trigger:

When a record is created or updated.

6. Set **Entry Conditions:**

Field: Offer_Amount__c

Operator: Greater than

Value: 1000000

7. Select:

Run Every time a record is created and meets the condition requirements.

8. Optimize the flow for **Actions and Related Records**.

9. Click on the + icon and add **Submit for Approval** action.

10. Select **Approval Process:**

High Salary Candidate Offer Approval

11. Enter the **Label** as:

Submit Candidate Offer for Approval

12. Map **RecordId** to the **Record Id** field.

13.1 Save the Flow and Activate.

Activity 3: Scheduled-Triggered Flow – Pending Candidate Application Follow-Up

Objective: Automatically identify candidate applications that are pending approval for more than 3 days and notify the Recruiter.

Schedule Condition: Runs daily

Steps:

From **Setup**, in the **Quick Find** box, search for **Flows**.

1. Click **New Flow**.
2. Select **Category:** Triggered.
3. Select **Type:** Scheduled-Triggered Flow.
4. Set the **Start Date and Time** (for example: Today, 9:00 AM).
5. Set **Frequency:** Daily.
6. Select **Object:** Candidate_Application__c.
7. Set **Condition Requirements:** Approval_Status__c Equals Pending
8. Set **Additional Condition:** LastModifiedDate Less than TODAY() – 3
9. Optimize the flow for **Actions and Related Records**.
10. Click on the + icon and add **Send Email Alert** action.
11. Select **Email Alert:** Candidate Application Approval Status Email Alert
12. Enter the **Label** as:

Pending Application Reminder

13. Map **RecordId** to the **Record Id** field.

14. Save the Flow and Activate.

Activity 4: Screen Flow – Candidate Application Creation Wizard

Objective: Provide a guided, user-friendly screen-based process for recruiters to create candidate applications.

Steps:

From **Setup**, in the **Quick Find** box, search for **Flows**

1. Click **New Flow**.

2. Select **Category:** Screen Flow

3. Click **Create**.

4. Add a **Screen** element:

Screen Name: Candidate Details

Fields:

Candidate

Job Opening

Application Date

5. Add another **Screen** element:

Screen Name: Offer Details

Fields:

Offer Amount

Experience Level

AI Candidate Score

6. Add a **Formula / Assignment**:

Calculate Final Offer Amount

7. Add a **Create Records** element:

Create Candidate_Application__c record

8. Add a **Confirmation Screen**:

Display:

Candidate Application Created Successfully

9. Save the Flow with name:

Candidate Application Screen Flow

10. Activate the Flow.

Milestone 10: Agentforce AI

Activity 1: Enable Agentforce & AI Trust Settings

Objective

Enable Agentforce features securely and control AI access for recruitment decision-making.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Agentforce**.
3. Click **Agentforce Setup**.
4. Click **Enable Agentforce**.
5. Go to **AI Trust & Permissions**.
6. Enable the following options:
 - Data Masking
 - Zero Data Retention
 - Audit Logging

7. Assign Agentforce access to:

- System Administrator Profile
- Hiring Manager Profile

8. Click **Save**.

Activity 2: Create Prompt Template – Candidate Application Summary

Objective

Generate an AI-based summary of a candidate application for recruiters and hiring managers.

Steps

- 1.From **Setup**, search for **Prompt Builder**.
- 2.Click **Prompt Builder**.
- 3.Click **New Prompt Template**.
- 4.Select **Prompt Type**: Summary.
- 5.Select **Object**: Candidate_Application__c.
- 6.Enter **Prompt Name**:

Candidate Application Summary Prompt

Prompt Content

Summarize the candidate application in simple terms including:

- Candidate Name
- Job Opening Applied
- Experience Level
- Proposed Offer Amount
- AI Candidate Score
- Application Status

Highlight any risks, strengths, or special considerations that may influence the hiring decision.

- 7.Click **Save and Activate**.

Activity 3: Create Prompt Template – Hiring Risk Analysis

Objective

Help hiring managers understand whether a candidate application is risky or high value.

Steps

- 1.Go to **Prompt Builder**.
- 2.Click **New Prompt Template**.
- 3.Select **Prompt Type**: Flex.

4. Select **Object:** Candidate_Application__c.

5. Enter **Prompt Name:**

- Candidate Hiring Risk Analysis Prompt

Prompt Content

Analyze this candidate application and determine:

- Probability of Successful Hiring
- Financial Risk Based on Proposed Salary
- Candidate Stability and Suitability
- Overall Hiring Risk Level (Low, Medium, High Risk)

Provide recommendations on whether to approve or reject the candidate offer.

6. Click **Save and Activate**.

Activity 4: Create Recruitment AI Agent

Objective

Create an AI agent to assist recruiters and hiring managers during recruitment.

Steps

1. From **Setup**, search for **Agents**.

2. Click **Agents**.

3. Click **New Agent**.

4. Enter **Agent Name:**

- Recruitment Assistant Agent

5. Enter **Description:**

- AI agent to assist with candidate screening, offer approvals, and hiring decisions.

6. Assign the following Topics:

- Candidate Application Summary
- Hiring Risk Analysis
- Offer Approval Guidance

7. Click **Next**.

Activity 5: Configure Agent Actions

Objective

Allow the agent to take intelligent recruitment actions.

Steps

1. Inside the Agent configuration, go to **Actions**.
 2. Add the following Actions:
 - Generate Candidate Application Summary
 - Analyze Hiring Risk
 - Recommend Approval Decision
 3. Map each Action to the corresponding Prompt Template.
 4. Click **Save**.
-

Activity 6: Configure Agent Data Library

Objective

Allow Agentforce to answer recruitment questions using Salesforce data.

Steps

1. In Agent Setup, click **Data Library**.
 2. Add the following Objects:
 - Contact (Candidate)
 - Job_Opening__c
 - Candidate_Application__c
 3. Set **Access Level**: Read Only.
 4. Enable **Field-Level Access Controls**.
 5. Click **Save**.
-

Activity 7: Test the Agent

Objective

Validate agent responses using real recruitment data.

Steps

1. Open a **Candidate Application** record.
 2. Launch the **Recruitment Assistant Agent**.
 3. Ask the following questions:
 - "Summarize this candidate application."
 - "Is this candidate safe to hire?"
 - "What risks are involved in this salary offer?"
 4. Verify the accuracy and clarity of the agent responses.
-

Activity 8: Deploy Agentforce

Objective

Make the recruitment AI agent available to users.

Steps

1. Go to **Agent Deployment**.
2. Choose **Deployment Type**:
 - Lightning Experience
3. Assign the agent to:
 - Recruiters
 - Hiring Managers
4. Click **Deploy**.

Milestone 11: The Lightning App

Activity 1: Create a Lightning App for “AI-Powered Recruitment & Candidate Management System” “From Setup, enter App Manager in the Quick Find and select App Manager.

1. Click New Lightning App.

2. Enter AI-Powered Recruitment & Candidate Management System as the App Name
>> Click on upload image and add an image related to AI-Powered Recruitment & Candidate Management System then click next
3. Under App Options, leave the default selections and click next.
4. Under Utility Items, leave as is and click Next.
5. From Available Items, select
Candidate Applications

Candidates (Contact) Job_Opening__c Accounts Reports Dashboards and move them to the Selected Item and Click Next.

1. From Available Profiles, select System Administrator, Recruiter, Hiring Manager and move it to Selected Profiles.
2. Click Save & Finish.

Milestone 12 -Editing of Page Layouts

Activity 1: To edit a Page Layout in Candidate_Application__c Object

1. Go to setup >> click on Object Manager >> type object name (Candidate_Application__c) in quick find box >> click on the Candidate Application object >> Page Layouts.
2. Click on the Candidate Application Layout.
3. Drag and arrange the field as shown below.
4. Click on Save.

Activity 2: To edit a Page Layout in Job_Opening__c Object

1. Go to setup >> click on Object Manager >> type object name (Job Opening) in quick find box >> click on the Job Opening object >> Page Layouts.
2. Click on the Job Opening Layout
3. Drag and arrange the field as shown below

Activity 3: To edit a Page Layout in Account Object

1. Click Save.
2. Go to setup >> click on Object Manager >> type object name (Account) in quick find box >> click on the Account object >> Page Layouts.
3. Click on the Account Layout
4. Drag and arrange the field as shown below
5. Click Save.

Activity 4: To edit a Page Layout in Opportunity Object

1. Go to setup >> click on Object Manager >> type object name (Opportunity) in quick find box >> click on the Opportunity object >> Page Layouts.
2. Click on the Opportunity Layout
3. Drag and arrange the field as shown below
4. Click Save

Activity 5: To edit a Page Layout in Contact Object

5. Go to setup >> click on Object Manager >> type object name (Contact) in quick find box >> click on the Contact object >> Page Layouts.
6. Click on the Contact Layout
7. Drag and arrange the field as shown below Click Save

Milestone13 - Dynamic Forms

Activity 1: To create a Dynamic Form in Candidate Application Object

- 1.Go to setup >> click on App Launcher >> Open “AI-Powered Recruitment & Candidate Management System” App >> click on the Candidate Application object tab>> Click on New and create a new record and save it .
- 2.Click on the record created and click on the Gear icon on the top right corner and Select Edit Page.
- 3.Click on the Details section and on the right pane click on Upgrade Now to enable Dynamic Forms for the object.
- 4.Select Candidate Application PageLayout and Click on Finish.
- 5.Click on Save and Click on Activate.
- 6.Click on Org as Default, select Desktop and Phone, click Next and Click Save. 7. Do the same for remaining objects as well.

Milestone14:Users

Activity 1: Create Recruiter User Note: Before Implementing Users first complete Profiles and Roles Milestones.

- 1.Go to Setup → type Users in the Quick Find box → select Users → click New User.
- 2.Fill in the following fields:
- 3.First Name : Recruiter
- 4.Last Name : User
- 5.Alias : Give an Alias Name (ex: recru)
- 6.Email Id : Give your personal Email Id
- 7.Username : Username should be in the format text@text.text and must be unique
- 8.Nick Name : Give a Nickname
- 9.Role : Recruiter

10. User License : Salesforce

11. Profile : Recruiter Profile

12. Click Save.

Activity 2: creating Hiring Manager user

1. Repeat the steps and create other users using

a. Role : Hiring Manager

b. User license : Salesforce

c. Profile : Hiring Manager Profile

Milestone 15 – Duplicate and Matching Rules

Activity 1: Create a Custom Matching Rule for Candidate (Contact)

Objective:

Objective: Ensure each candidate is uniquely identified using Email and Phone.

Steps:

1. Go to Setup.

2. In the Quick Find box, search for Matching Rules.

3. Click New Rule.

4. Select Object: Contact and click Next.

5. Enter Rule Name: Unique Candidate – Email & Phone.

6. In Matching Criteria:

- Field: Email → Matching Method: Exact
- Field: Phone → Matching Method: Exact

7. Check Match Blank Fields.

8. Click Next.

9. Click Save & Activate.

Activity 2: Create a Duplicate Rule for Candidate (Contact)

Steps:

- 1.Go to Setup.
- 2.Search for Duplicate Rules.
- 3.Click New Rule.
- 4.Select Object: Contact.
- 5.Enter Rule Name: Unique Candidate Email and Phone.
- 6.Set Action on Create and Action on Edit: Allow and Report.

In Alert Text:

Student Email and Phone Number must be unique.

- 7.In the Matching Rules section:

- 8.Click Add Rule.

- 9.Select the previously created Matching Rule (Unique Candidate – Email & Phone).

- 10.Click Save & Activate.

Milestone 16: Profiles

Activity 1: Recruiter Profile Creation**Objective**

Provide recruiters with controlled access to candidate applications, job openings, AI hiring insights, and daily recruitment activities.

Steps

- 1.Go to **Setup**.
- 2.In the **Quick Find** box, search for **Profiles**.
- 3.Click **Profiles**.
- 4.Clone the **Standard User** profile.
- 5.Enter the **Profile Name**:

- Recruiter Profile

6. Click **Save**.

7. While still on the profile page, click **Edit**.

8. Select the **Custom App** as default:

- AI-Powered Recruitment & Candidate Management System

9. Under **Custom Object Permissions**, grant **Read, Create, Edit** access for:

- Contact (Candidate)
- Candidate_Application__c
- Job_Opening__c

10. Grant **Read-Only** access for:

- Reports
- Dashboards

11. Set **Session Timeout**:

- 2 hours of inactivity

12. **AI & Agentforce Access**:

- Read access to AI Candidate Score
- No approval or override permissions

13. Configure **Password Policies**:

- Passwords expire in 90 days
- Minimum password length = 8

14. Click **Save**.

Activity 2: Hiring Manager Profile Creation

Objective

Provide hiring managers with full access to candidate applications, approvals, AI hiring recommendations, and recruitment management.

Steps

1. Go to **Setup**.

2. In the **Quick Find** box, search for **Profiles**.

3. Click **Profiles**.

4. Clone the **Standard User** profile.

5. Enter the **Profile Name**: Hiring Manager Profile

6. Click **Save**.

7. While still on the profile page, click **Edit**.

8. Select the **Custom App** as default:

- AI-Powered Recruitment & Candidate Management System

9. Grant **Read, Create, Edit, Delete** access for:

- Contact (Candidate)
- Candidate_Application__c
- Job_Opening__c
- Reports
- Dashboards

10. Configure **Approval Permissions**:

- Can approve/reject high salary offers
- Can override AI recommendations

11. **AI & Agentforce Access**:

- Full visibility of AI Candidate Score
- Risk Analysis
- Hiring Recommendations

12. Set **Session Timeout**:

- 2 hours

13. Click **Save**.

Milestone 17: Roles & Role Hierarchy

Activity 1: Creation of Hiring Manager Role

Creating Hiring Manager Role:

1. Go to Quick Find

→ Search for Roles

→ Click on Set Up Roles.

2. Click Expand All and click Add Role under CEO.

3. Enter:

- Label: Hiring Manager
- Role Name: Auto populated

4. Click Save.

Activity 2: Creation of Recruiter Role

Creating Recruiter role under Hiring Manager role:

1. Go to Quick Find

→ Search for Roles

→ Click on Set Up Roles.

2. Click the + (Add Role) under Hiring Manager.

3. Enter:

- Label: Recruiter
- Role Name: Auto populated

4. Click Save.

7. FUNCTIONAL & PERFORMANCE TESTING

The AI-Powered Recruitment & Candidate Management System was tested to verify that all features work as expected. Functional testing confirmed the proper operation of candidate management, job openings, Flows, Approval Processes, and Agentforce AI features. Performance testing ensured that the system responded quickly and handled recruitment data efficiently. Reports and Dashboards generated accurate recruitment insights without errors. The testing results confirmed that the application is reliable, secure, and ready for use.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Automates the recruitment process, reducing manual effort.
- Centralizes candidate and job opening information in Salesforce.
- Uses Agentforce AI for intelligent candidate summaries and recommendations.
- Improves data accuracy through Validation Rules and automation.
- Provides real-time insights with Reports and Dashboards.

Disadvantages

- Requires a Salesforce license and internet connectivity.
- Initial setup and configuration can be time-consuming.

- Users need basic Salesforce knowledge and training.
- AI recommendations depend on the quality of candidate data.
- Customizations may require updates as business requirements change.

9. Conclusion

The **AI-Powered Recruitment & Candidate Management System** successfully streamlines the recruitment process by automating candidate management, interview scheduling, and hiring workflows using Salesforce. The integration of Agentforce AI and Prompt Builder enables intelligent candidate evaluation and faster decision-making. Automation through Flows, Approval Processes, and Validation Rules improves efficiency and data accuracy. Reports and Dashboards provide valuable insights into recruitment activities. Overall, the system offers a secure, scalable, and efficient solution for modern recruitment management.

10. FUTURE SCOPE

- Integrate resume parsing and AI-based candidate matching for faster screening.
- Add WhatsApp, SMS, and email notifications for improved communication.
- Develop a mobile application for recruiters and candidates.
- Implement predictive analytics to forecast hiring trends and workforce needs.
- Integrate with external job portals such as LinkedIn and Indeed for seamless job posting and candidate sourcing.

11. APPENDIX

- **Project Title:** AI-Powered Recruitment & Candidate Management System
- **Platform:** Salesforce CRM (Developer Org)
- **Technologies Used:** Salesforce Lightning Experience, Custom Objects, Flow Builder, Approval Processes, Validation Rules, Reports & Dashboards, Agentforce AI, Prompt Builder.
- **Development Tools:** Salesforce Developer Org, Prompt Builder, Agentforce, Lightning App Builder, Flow Builder.
- **Project Modules:** Job Opening Management, Candidate Management, Candidate Applications, AI-Powered Candidate Summary, Interview Management, Approval Process, Reports & Dashboards.
- **Project Deliverables:** Configured Salesforce application, AI-powered recruitment assistant, automation workflows, reports, dashboards, and project documentation.

Thank You
